

DRisti AI - Medical Report

Generated on: 09 May 2026

Patient Information

Patient Name	abhishek
Age	33.0

Diabetic Retinopathy Analysis

Detected Stage: No DR

AI Assessment: Automated Screening Result

Diabetes Risk Assessment (Supporting)

Risk Level: Diabetic

Clinical Interpretation

This report is generated using AI-based retinal image analysis. The results indicate possible signs of diabetic retinopathy. This screening tool is designed for early detection and should not replace professional diagnosis.

Clinical Recommendation

Routine eye check-ups and maintaining a healthy lifestyle are advised.
